INDIVIDUAL PRACTITIONERS

Your credentials, always in view.

ValKred is the professional credential wallet and workforce readiness platform for fire & EMS, healthcare, safety & environmental compliance, technology & project management, and business & human resources professionals.

The Consumer Vault

A private, encrypted digital wallet designed strictly for the individual clinician, firefighter, and certified specialist.

50-State Portability Engine

Compact privileges under the EMS Compact (REPLICA), the Nurse Licensure Compact and IFSAC/Pro Board reciprocity, and what a new state would still require when you relocate or take a travel contract.

Shareable Proof

Create a link or scannable QR code that shares a credential's record with a credentialing committee or hiring manager. Set when it expires, revoke it anytime, and your private notes stay private.

Positive-Framing Alerts

Calm pacing that shows whether you are on pace for each cycle, with reminders at 90, 60, 30 and 14 days instead of last-minute red alarms.

Automatic Extraction

Drop in a certificate and we read the title, hours, and issuer for you to confirm.

Fields we cover today

- Fire & EMS
- Nursing
- Safety (EHS)
- IT
- Engineering
- HR
- Education
- Insurance
- Real estate
- Trades
- Attorney MCLE
- Project management (PMI)
- Financial planning (CFP)

Any certification can be added yourself, with your own renewal rules. **Request a field** at **valkred.com/contact**.

The Employer Benefit Partner Program

Employers can offer ValKred Pro as part of their employee benefits package, at no direct cost to the organization. Employees get an ongoing discount off ValKred Pro for as long as they're employed there. It's a simple, zero-overhead perk your employer can offer alongside the benefits you already have.

Want this at your workplace? Have your employer's HR or benefits team reach out to us directly and we'll get it set up. The other side of this page is for them.

FOR HR AND BENEFITS TEAMS

Your whole team, in one view.

Employees join through a one-link Handshake and appear on your Readiness Grid by department and team, with who has credentials on file. Export the roster in one click.

The "Handshake" Protocol

Employers share an organization invite link. Employees confirm their work email and join your grid, with no manual data entry.

Readiness Grid

A clean overview of everyone who has joined, by department and team, and who has credentials on file.

Audit Transcripts & Roster Export

Each practitioner can compile any credential's completion history, requirement evaluation and attached proof into a single PDF audit transcript in one click, ready to hand to you.

Readiness-Check API

Your HRIS or scheduling system can call our readiness-check API to look up a person's active credentials before a roster is published. We set it up with your team.

Public safety agencies can use the same API with their own scheduling tools.

Flat pricing by team size, with no per-seat fee.

Flat monthly pricing by team size, no per-seat metering and no minimum spend. Larger organizations get a custom quote.

Founder-led setup. You'll work directly with the team that built ValKred to get your roster synced and your readiness grid live.

The Employer Benefit Partner Program

Employers can offer ValKred Pro as part of their employee benefits package, at no direct cost to the organization. Employees get an ongoing discount off ValKred Pro for as long as they're employed there. It's a simple, zero-overhead perk your employer can offer alongside the benefits you already have.
